Weatherization Works!

Information for clients who have signed up for the Weatherization program!

Home weatherization can help you stay more comfortable all year long, and reduce your energy bills by up to 20 – 30%.

After you have signed up for the Weatherization Program your application will be processed to determine if you are eligible for the service. If all the necessary information is available, a letter will be sent to you informing you of your eligibility. The letter will give you information about the selection process for clients who are on our waiting list for the weatherization service.

*The **Auditor/ Inspectors** will select clients from the waiting list according to the priorities described in the eligibility letter. He will then contact you by phone to schedule an appointment for the inspection to determine what improvements are needed to make your home more energy efficient. A private contractor who has been hired by our agency will complete all the work. **It is essential that we have a home or message phone number so the inspection and the contractor's work can be scheduled. If your phone number changes or is disconnected, please contact us with a new number where we can contact you.***

If you decide to move, please let us know so we can close your case and move on to the next person on the waiting list. You may reapply at your new address.

THE WEATHERIZATION SERVICE CAN INCLUDE THE FOLLOWING:

- **Caulking and weather-stripping**
- **Repair or replacement of broken windows and doors**
- **Sealing of foundation cracks**
- **Insulation and ventilation**
- **Wall Insulation**
- **Minor furnace repair (If you own your home and your furnace is inoperable, you may be eligible for furnace replacement.)**
